

Deinstallation Guide for Magento Extensions

Introduction

When deinstalling the extension, it's important to follow the steps below in exactly the order given here. Otherwise you risk errors in your Magento system.

Deactivate Extension

Go to the following folder in your Magento system:

📁 / app / etc / modules /

There you will find the XML file „Modulwerft_EmailManager.xml“. Open the file with a text editor and change the following line

```
<active>true</active>
```

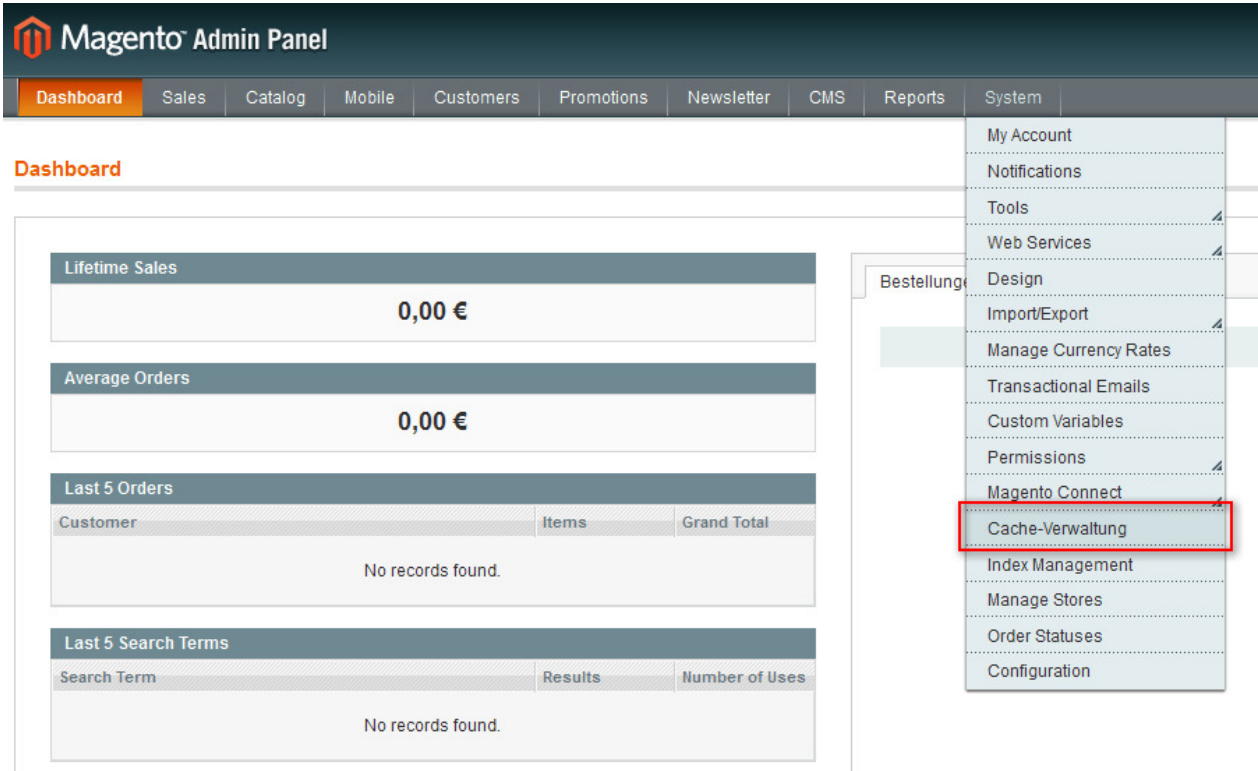

as follows:

```
<active>>false</active>
```

Afterwards, save the file.

Clear Magento Caches

If you have not activated the configuration's cache in your Magento store, you may skip this step. If your cache is – as it usually should – activated, please log into your Magento admin panel and go to the cache management as shown below:

The screenshot shows the Magento Admin Panel dashboard. The 'System' menu is open, and 'Cache-Verwaltung' is highlighted with a red box. The dashboard includes sections for Lifetime Sales (0,00 €), Average Orders (0,00 €), Last 5 Orders (No records found), and Last 5 Search Terms (No records found).

Tick the checkbox for „Configuration“ and click „Submit“:

The screenshot shows the 'Cache-Verwaltung' page. The 'Konfiguration' checkbox is checked, and the 'Absenden' button is highlighted. Annotations indicate: 1. Haken setzen (checkbox) and 2. "Absenden" klicken (button).

Cache Art	Beschreibung	Verbundene Schlagworte	Status
<input checked="" type="checkbox"/> Konfiguration	System (config.xml, local.xml) und Modul Konfigurationsdateien (config.xml).	CONFIG	AKTIVIERT
<input type="checkbox"/> Layouts	Layout Aufbau-Anweisungen / Kommandos.	LAYOUT_GENERAL_CACHE_TAG	AKTIVIERT
<input type="checkbox"/> Block HTML Ausgabe	Seiten Block HTML.	BLOCK_HTML	AKTIVIERT
<input type="checkbox"/> Übersetzungen	Übersetzungsdateien (.csv)	TRANSLATE	AKTIVIERT
<input type="checkbox"/> Sammlungsdaten	Dateien für Sammlungsdaten.	COLLECTION_DATA	AKTIVIERT
<input type="checkbox"/> EAV Typen und Attribute	Deklarations-Cache für Entitäts Typen.	EAV	AKTIVIERT
<input type="checkbox"/> Konfiguration der Web Dienste	Definitionsdateien für Web Dienste (api.xml).	CONFIG_API	AKTIVIERT

Magento now updates the system's configuration and will notice the previously installed extension is now deactivated.

Please make sure that both the store's frontend and admin panel still work properly and that all menu items of the extension are gone.

Remove Extension's Files

Now you can safely remove the extension's files. The following folders and files must be deleted:

- 📁 /app/code/community/Modulwerft/EmailManager
- 📁 /app/design/adminhtml/default/default/template/modulwerft/emailmanager
- 📁 /js/modulwerft/emailmanager
- 📁 /skin/adminhtml/default/default/css/modulwerft/emailmanager
- 📁 /skin/adminhtml/default/default/images/modulwerft/emailmanager
- 📄 /app/design/adminhtml/default/default/layout/modulwerft/emailmanager.xml
- 📄 /app/etc/modules/Modulwerft_EmailManager.xml
- 📄 /app/locale/de_AT/Modulwerft_EmailManager.csv
- 📄 /app/locale/de_CH/Modulwerft_EmailManager.csv
- 📄 /app/locale/de_DE/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_AU/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_CA/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_GB/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_IE/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_NZ/Modulwerft_EmailManager.csv
- 📄 /app/locale/en_US/Modulwerft_EmailManager.csv

Delete Database Tables and Entries

The extension has created the following tables in your database:

- modulwerft_emailmanager_email_log
- modulwerft_emailmanager_email_log_entity
- modulwerft_emailmanager_email_log_attachment
- modulwerft_emailmanager_email_type
- modulwerft_emailmanager_email_type_mapping

To delete these, execute the following SQL commands at once:

```
SET FOREIGN_KEY_CHECKS = 0;
DROP TABLE `modulwerft_emailmanager_email_log`;
DROP TABLE `modulwerft_emailmanager_email_log_entity`;
DROP TABLE `modulwerft_emailmanager_email_log_attachment`;
DROP TABLE `modulwerft_emailmanager_email_type`;
DROP TABLE `modulwerft_emailmanager_email_type_mapping`;
SET FOREIGN_KEY_CHECKS = 1;
```

Finally, to completely deinstall the extension from Magento, it has to be deleted from the table of extensions:

```
DELETE FROM `core_resource` WHERE code = 'modulwerft_emailmanager_setup';
```

The extension is thereby completely deinstalled.

Get Modulwerft Support

In case you experienc any difficulties during the deinstallation, please feel free to contact our support team by email to support@modulwerft.com.
